Product Information Bulletin

DuroSpan[®] GPS Insulation - CAN/ULC-S701, Type 1 Material Property Data

DuroSpan[®] **GPS** insulation is a rigid, closed-cell expanded polystyrene (EPS) insulation with a silver-gray colour that meets or exceeds requirements as per CAN/ULC-S701¹, Type 1. **DuroSpan GPS** insulation has laminated films on the top and bottom surfaces which result in a more durable product that is less susceptible to handling damage.

DuroSpan GPS insulation is manufactured using **Neopor**[®] **F5300 GPS Plus**, a graphiteenhanced expandable polystyrene (GPS) provided by BASF. The graphite within the cellular structure of **DuroSpan GPS** insulation reduces radiation heat transfer resulting in enhanced thermal resistance compared to standard white EPS insulation.

Material Properties	Test Method	Units	Values
Thermal Resistance ²	ASTM	m ² •°C/W	0.82
Minimum per 25 mm (inch)	C518	(ft²•h•°F/BTU)	(4.7)
Compressive Resistance Minimum @ 10% Deformation	ASTM D1621	kPa	70
		(psi)	(10)
Flexural Strength Minimum	ASTM C203	kPa	170
		(psi)	(25)
Water Vapour Permeance ³ Maximum for 25-mm (1-inch) thickness	ASTM E96	ng/(Pa•s•m²)	30
		(Perms)	(0.5)
Water Absorption ⁴ Maximum	ASTM D2842	% By volume	6.0
Dimensional Stability Maximum, 7 Days @ 70 $\pm 2 \ \ C (158 \pm 4 \ \ F)$	ASTM D2126	% Linear Change	1.5
Limiting Oxygen Index Minimum	ASTM D2863	%	24
Surface Burning Characteristics Classification or Rating	CAN/ULC S102.2	Flame Spread	220
		Smoke Developed	Over 500

1. CAN/ULC-S701-11, Standard for Thermal Insulation, Polystyrene, Boards and Pipe Covering.

2. *DuroSpan GPS* insulation material properties are third party certified under a quality listing program administered by Intertek. See Intertek Code Compliance Research Report CCRR-1033 for detailed code compliance information.

3. Unfaced EPS insulation *maximum* vapour permeance is 300 ng/Pa•s•m² (5.0 perms). *DuroSpan GPS* insulation vapour permeance is significantly lower as a result of the laminated films. Where water vapour permeance is a design issue, contact Plasti-Fab technical services for additional information.

4. The water absorption laboratory test method involves complete submersion under a head of water for 96 hours. The water absorption values above are applicable to specific end-use design requirements only to the extent that the end-use conditions are similar to test method requirements.
