INSULATION PROJECTS using **DuroFoam**[®] Insulation

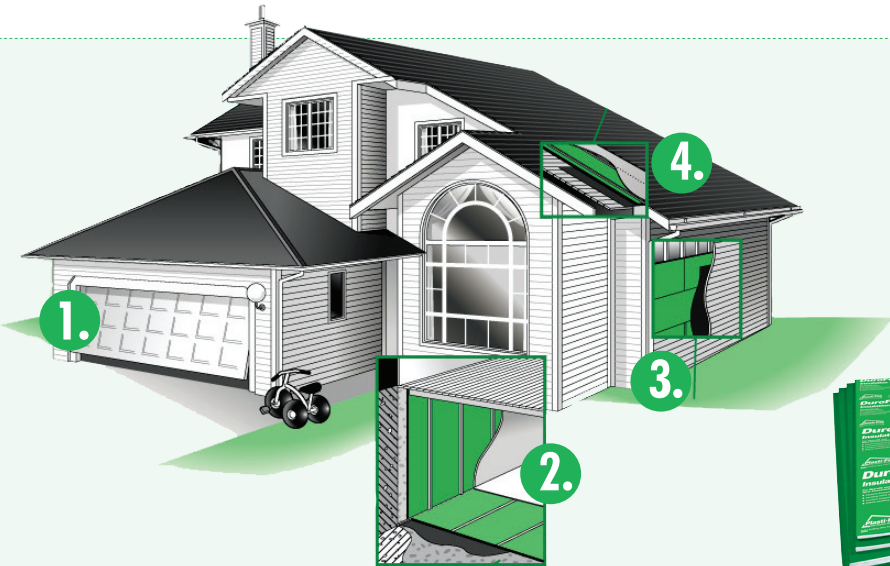

EcoLogo[®]

Certifié EcoLogo Certified
Thermal Insulation CCD-016
Isolation thermique DCC-016

Better building ideas from PFB[™]

1. Garage Walls

- Install on exterior garage walls to save on energy
- Make your garage a warmer place for a workshop, etc.

2. Basement Walls & Floors

- Install above or below a concrete slab
- Reduce your energy costs
- Install on interior or exterior of concrete wall
- Provides long-term R-value

3. Exterior Sheathing

- Install over exterior of wall framing for new construction
- Increase R-value and reduce air leakage

4. Cathedral Ceilings

- Install above roof deck
- Provides uniform insulation and increased R-value

- Retrofit & new construction
- Exterior insulating sheathing
- Insulating interior basement walls
- Insulating foundation walls
- Insulating cathedral ceilings

PlastiSpan & DuroFoam Insulation meets National Building Code requirements for above and below grade applications.
