

With the rapid spread of the Coronavirus (COVID-19), I hope this communication finds you and your entire team well. The health and wellbeing of our organizational team members and their families are of utmost importance.

We are working to protect the health and safety of our employees by limiting non-essential in-person meetings, events, shows, gatherings, and restricting non-essential business travel. We will make every effort to ensure minimal impact on our customers and appreciate your cooperation with our efforts to reduce the spread of the COVID-19.

Plasti-Fab has activated an Emergency Response Taskforce to closely monitor, coordinate, and inform us of the situation. We are working with relevant authorities and other stakeholders to ensure the safety of all our employees, their families, contractors and visitors.

The government of Canada and the USA are advising against all international travel to limit the spread of the virus. Based on current information, these restrictions do not apply to the transfer of goods between Canada and the USA; hence we currently do not expect any significant change in the delivery of our products.

In anticipation of any unexpected delays in supply due to the COVID-19 pandemic, we are increasing inventory levels to ensure that there is no shortfall or delay in the supply of our products.

We appreciate your business. Your partnership to promote ongoing collaboration is key within our efforts to navigate this ever-changing situation.
