### GREENGUARD Gold Certification Listings - Plasti-Fab EPS Insulation

As part of its commitment to quality and ongoing sustainability initiatives, Plasti-Fab has recently received GREENGUARD Gold Certification for its expanded polystyrene (EPS) insulation products. The certification includes PlastiSpan<sup>®</sup>, DuroSpan<sup>™</sup>, DuroFoam<sup>®</sup>, EnerSpan<sup>®</sup> and ENERGREEN<sup>®</sup> insulation, as well as the Advantage ICF System<sup>®</sup>.

The certification has been developed with UL Environment, an independent global safety science organization using their process and procedures in accordance with established environment and safety standards.

The GREENGUARD Certification mark on Plasti-Fab products gives assurance that products designed for use in indoor spaces meet strict chemical emissions limits, which contribute to the creation of healthier interiors. The achievement of GREENGUARD Certification gives credence to Plasti-Fab sustainability claims, backing them with empirical scientific data from an unbiased, third-party organization.

The GREENGUARD Gold standard achieved by Plasti-Fab EPS products includes health based criteria for additional chemicals and also requires lower total VOC emissions levels to ensure that products are acceptable for use in environments such as schools and healthcare facilities. In addition to limiting emissions of more than 360 VOCs and total chemical emissions, GREENGUARD Gold Certified products must also comply with requirements of the State of California's Department of Public Health "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers, Version 1.1 (2010)" (also known as California Section 01350).
