Annual Public TRA Summary Report- Plasti-Fab Ajax Operational Comparison 2016-2017

Basic Facility Information

Name & CAS of Substance	VOC(Pentane)		NA-M16			
	Particulate Matter 2.5 (PM2.5)		NA-M10			
Facility Identification and Site Address						
Company Name	Plasti-Fab Ltd					
Facility Name	Ajax Manufacturing Plant					
Facility Address	Physical Address		Mailing Address			
	40 Mills Road, Ajax, ON, L1S 2H2		same			
Spatial Coordinates of Facility	Zone 17		UTM NAD83			
	Easting: 658	675				
	Northing: 4857137					
Number of Employees	23					
NPRI ID	6894					
Ontario MOE ID number	9258					
Parent Company (PC) Information						
PC Name & Address	PFB Corporation		Publically traded - TSX			
Primary North American	5 Digit	326140 Polystyrene	foam product manufacturing			
Industrial Classification System	4 Digit	3261 Plastic Product	manufacturing			
Code (NAICS)	2 Digit	32 Manufacturing				
Company Contact Information						
Facility Public Contact and	Joel Dantas		Manufacturing Manager			
Highest Ranking Employee	jdantas@plastifab.com		Phone: 905-619-4803			
Facility Technical Contact	John Brazzale, Director, HSE		Box 88 802 McCool St.			
			Crossfield, AB, TOMOSO			
	jbrazzale@plastifab.com		Phone: 403-946-6248			

STATEMENT OF INTENT

At PFB Corporation (parent company of Plasti-Fab Ltd.), we are concerned with the future of the planet and the effects that modern life styles may be having on climate change. PFB Corporation is committed to conducting our operations responsibly, mindful of the economic, environmental and social impacts of our operations. We have always placed environmental protection at the highest level of importance in our products, our processes and our practices. It is our intent to continue reducing our impacts on the environment that occur as a result of manufacturing energy saving insulation solutions for our customers.

Plasti-Fab Ajax, at this time, has no intent to reduce VOC (Pentane) due to lack of technically feasible options. The creation of PM2.5 is a result of a specific operation within the process and as a product of natural gas combustion, at this time there is no intent to reduce this substance due to the lack of technically feasible options.

Plasti-Fab: 2017 Annual Public TRA Summary Report - Ajax rev 2.docx

TOXIC SUBSTANCES

Two (2) substances were required to be tracked, quantified and reported for under TRA – Phase 2 requirements for the 2012 operational year. These substances are VOC (Pentane) and Particulate Matter 2.5. Reporting completed to the Ministry of Environment under O.Reg. 455/09 through SWIM.

VOC Summary

VOC (Pentane) is contained in the resin material used to produce EPS foam insulation products for residential and commercial construction market and for consumers. There is no reduction strategies planned for this substance.

Particulate Matter 2.5 Summary

Particulate matter (PM2.5) is created by the combustion of natural gas for process steam production, general heating and during the foam cutting process. A strategy has been developed to improve the quality of emission data for this substance. There is no reduction strategies planned for this substance.

TRACKING AND QUANTIFICATIONS

The method used to calculate the TRA quantifications was a mass balance approach based on production records and emission estimates or published AP-42 emission factors. This is the best available method as there is no equipment specific monitoring data available.

Table 1 is a summary of reported TRA quantities for the 2017 operational year. Changes identified are directly related to changes in production levels.

In the 2017 operational year, there were no out of the ordinary incidents or significant process changes at the facility.

COMPARISION OF TRACKING AND QUANTIFICATION

No changes were made in the quantification and tracking methodology from 2016 to 2017.

DESCRIPTION OF STEPS TAKEN TO ACHIEVE OBJECTIVE AND ASSESS EFFECTIVNESS

There was no technologically feasible reduction strategy objectives identified for either VOC (Pentane) or PM2.5 within the facility and as such there was no economic feasibility study completed for this substance.

Table 2 provides a summary of the facility TRA changes and updates which took place in 2017.

Table 1: Comparison of Quantities Reported

CAS	NA-M16	NA-M10	
Substance	VOC (Pentane)	PM2.5 - Particulate Matter	
Description of Processes	Used as a formulation component	Foam Cutting and Supporting Operations	
Reporting under NPRI Part	Part 1	Part 4	
NPRI Threshold (tonnes)	10 (MPO)	0.3 (Release)	
2017 Used (tonnes)	>10 -100	0	
2016 Used (tonnes)	>10-100	0	
% Change	-3%	0%	
2017 Created (tonnes)	0	>0-1	
Created 2016 (tonnes)	0	>0-1	
% Change	0%	-2.5%	
2017 Releases - Air (tonnes)	>10-100	>0-1	
2016 Releases - Air (tonnes)	>10-100	>0-1	
% Change	-3%	-2.5%	
Reason for Changes	No significant change	No significant change	

Table 2:	Changes in Quantifications, Quantities and Plan Updates	
CAS	NA-M16	NA-M10
Substance	VOC (Pentane)	PM2.5 - Particulate Matter
Quantification Method(s) Used	Mass Balance/Emission Factors	Mass Balance/Emission Factors
Change in Quantification Method Used	No change	No change
Rationale for Using Selected Method(s)	No site specific monitoring data available	No site specific monitoring data available
Incidents out of the Ordinary	No	No
Significant Process Change	No	No
Objectives, Descriptions, Targets	No reduction options were identified to be both technically and economically feasible.	No reduction options were identified to be both technically and economically feasible.
Actions	None	None
Amendments	None	None

ON MOE TRA - Electronic Certification Statement

Annual Report Certification Statement

As of 28/05/2018, I, Joel Dantas, certify that I have read the reports on the toxic substance reduction plans for the toxic substances referred to below and am familiar with their contents, and to my knowledge the information contained in the reports is factually accurate and the reports comply with the Toxics Reduction Act, 2009 and Ontario Regulation 455/09 (General) made under that Act.

TRA Substance List

CAS RN Substance Name

NA - 35 Pentane (all isomers)

NA - M08 Total Particulate Matter

Company Name Plasti-Fab Ltd.

Highest Ranking Employee

Joel Dantas

Report Submitted by John Brazzale

Website address

I, the highest ranking employee, agree with the certification statement(s) above and acknowledge that by checking the box I am electronically signing the statement(s). I also acknowledge that by pressing the 'Submit Report(s)' button I am submitting the facility record(s)/report(s) for the identified facility to the Director under the Toxics Reduction Act, 2009. I also acknowledge that the Toxics Reduction Act, 2009 and Ontario Regulation 455/09 provide the authority to the Director under the Act to make certain information as specified in subsection 27(5) of Ontario Regulation 455/09 available to the public.
